

What's New in UiPath 2019 Fast Track Release

May 2019

Powering the automation first era

릴리즈 하이라이트

GIT 연동 지원
오케스트레이터 실시간 대쉬보드
로봇 실행 스냅샷 관리

Plus...

- Studio development accelerators
- AI powered activities
- Improved Native Virtualization support
- Upgraded Veracode certification
- Lotus Notes email support
- Document Processing Framework
- Tighter Microsoft 365 integration

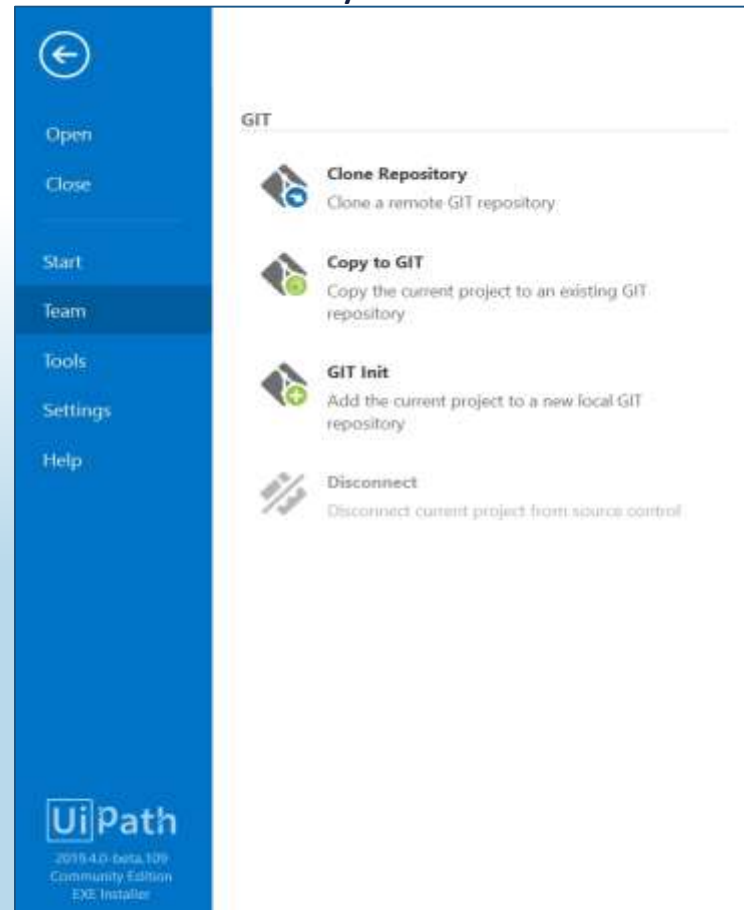

And many more capabilities....

개발자 생산성 향상

Git support, workflow difference, and development accelerators speed development and provide an improved developer experience.

- **Git Support:** Stay informed and collaborate easily with Git integration, the world's most popular version control system.

Scale easily with improved Orchestrator governance and security capabilities for your digital workforce.

- **Real-time Dashboard:** Stay up-to date with real-time status and alerts on a globally deployed digital workforce.
- **Veracode Verified Continuous Certification:** Get defense grade security with the highest level of certification in the Veracode program. The UiPath Platform is certified at the Verified Continuous level.
- **Execution Snapshots:** Simplify troubleshooting with Orchestrator's on-demand viewable snapshots of the moments before any unattended automation fails.

Start your attended automaton in the blink of an eye.

- Start attended automation in seconds with a preset keyboard shortcut and save the time of going through multiple steps each time.
- Map each attended automation to a unique key combination of two to four keys.
- You can setup shortcuts without admin intervention and they can roam across multiple machines.

Get reliable, resilient, automation from AI-powered features like Computer Vision and the Document Processing Framework.

- **Computer Vision***: Let Robots “see” the screen and visually identify all the elements, rather than relying on their hidden properties, IDs, and other metadata, thus enabling automations for VDIs and other unsupported frameworks.

Perform innovative, quick, and effective automation on applications like Citrix, Lotus Notes, and PDF with application activity.

- **Improved Native Virtualization support:** Use native selectors in automations in Citrix XenApp, XenDesktop and Microsoft RDP-based virtual desktop infrastructure (VDI) environments.
- **Lotus Notes email support:** Simply drag-and-drop Lotus Notes activities for easy, quick, and reliable automation of important email tasks in Lotus Notes.
- **PDF support:** The PDF activity package comes with complete functionality that enables more complex PDF file handling scenarios.

The Citrix logo, featuring the word "CITRIX" in a bold, black, sans-serif font with a registered trademark symbol (®) to the upper right.

Microsoft 개발도구 지원

Automate with Microsoft Office 365 and extend Studio with Microsoft Visual Studio Activity Set.

- **Office 365 activities:** Enhance your productivity as robots can now automate events for Excel Online, Outlook, and OneDrive using Microsoft Office 365 Activities package.
- **Visual Studio Activity Set Extension:** Easily create a custom activity in Visual Studio that works immediately in UiPath Studio.

Visual Studio | Marketplace

Studio 내부에서 Go 연결

Access the time-saving magic of UiPath Go! within Studio.

- Maintain your focus and remain in Studio for RPA development.
- Studio now automatically displays a feed of Go! components.
- Directly download Go! components from within Studio, no need to open web browser.

Highlight your RPA achievement for all to see.

- Connect! profiles now feature the highly-coveted Certified RPA Developer SuperBadge.
- Employers can identify hiring certified RPA professionals as evident from Connect! SuperBadge.
- RPA professionals can now showcase their expertise for potential employers.
